

Dear Madam

I, Gauri Deshpande, mother of Shriwata Deshpande, studying in senior KU Star (A15), wanted to share my feelings about this school. I wanted to talk during our concert and even during PTM's, but me being very emotional cannot express in front of everyone. So writing a small thanksgiving letter to you. Thanks is a very small word for what dedication, love and affection you have been shown to our children.

Principal is the one who holds everyone together and makes success every year. You being my favorite, I always use to wait for the PTM when principal madam will arrive and talk with us. You come with full energy, enthusiasm and a fresh, happy smile. I feel very fresh and happy. I like the way you ~~have~~ kept the happy relation with all the teachers, maushis and children. You being straight forward in all the matters is very appreciating one, whether it is positive or negative aspect. Your this quality shows how the Principal should be to run such a big organization.

Running Pre-primary school is very difficult where you come up with many challenging parents, listen to them and convince or get convinced accordingly. You are doing a very tremendous job. Please continue the way you are and do not change the rules for the pressure from parents. Until now, our children carried less bag weightage which is going to be the disadvantage, once they enter primary school. I respect your "Child Centered" decisions.

These "Generation Alpha" kids are over protected by their parents. But you have seen the practical problems what the children face and guide their parents accordingly, so that children are safe and well educated. If each and every parent follows the instructions given by you and all the teachers, our children will bag safe place in the world. You have been providing the stage for various activities to conduct so that upbringing of our children becomes easy for each and every parent.

The loving, caring nature of teachers and maushis of this school is very appreciating one. We are really going to miss this school and everything. A big hats off to you and your team madam. I hope to get such loving and caring teachers and Principal in future. I will still get a chance to meet you all again for my daughter. I hope nothing will change till I come back. I am already suggesting my friends and family, if you want your child to become independent, discipline, loving, caring and helping and specially learn with fun please join this school and see the development of your children.

I have only one suggestion to make, you have organised programs for,

- 1) Grandparents
- 2) Story telling by maushis and vanisakas.
- 3) Library for maushis and vanisakas
- 4) Teacher's day for teachers
- 5) Father child trek for fathers and children.

Please organize some program for mother and the child also. Mothers are always taken for granted as we do everything for them. We also need some appreciation, so that we can become much more happier and energetic to make our children grow in a positive way.

Thanks You Once Again 😊
